- | | | | |
|-------------------|---|---|-----------------------------------|
| • VS Code (IDE's) | • Git and Github (Version control system) | • Heroku, Vercel (Deployment platforms) | • Postman (API testing platforms) |
|-------------------|---|---|-----------------------------------|

PROJECTS

The Custom Bakers

- Led the development of online cakes, flowers, and gifting stores in Pune, serving over a thousand orders with a focus on reliability and value.
- My role is to implement React.js for frontend development, integrated APIs using Axios, and Formik for validation, crafted responsive UI with material UI and bootstrap, ensuring seamless user experience across devices.

Urban Move - Ride Sharing Platform

- Built a web application where user or driver can login, register itself, manages its profile, book a ride, fair estimates, secure payments and a responsive UI.
- Implemented real time GPS tracking and live ride status using Google Maps API and Socket.io with scalable cloud database deployment on MongoDB.

E-Commerce-Website

- Developed a responsive and user-friendly e-commerce website featuring seamless online shopping capabilities.
- I have implemented the features such as product catalog browsing, user authentication, shopping cart management and a user friendly wishlist functionality.

CRUD Application

- Here the user can perform some basic data manipulations such as Create, Read, Update, and Delete.
